Seamless Flexible Protection for Thermal Insulation

Belzona® 3211 (Lagseal) is a single component water based micro-porous coating for the sealing and long term protection of all types of thermal insulation.

This versatile system is resistant to water, weather, fire and can be applied to damp as well as dry surface.

Belzona® 3211 (Lagseal) will:

- Provides a seamless finish
- Provides long term protection
- Follows complex contours
- Reduces safety hazards

Belzona® 3211 (Lagseal) can be applied without the need for specialist tools. It is a two layer application reinforced with glass fibre sheeting.

Pipework

Tanks

Encapsulation of Insulation

Exhaust Ducting

Applications for Belzona® 3211 (Lagseal) include:

- Encapsulation of insulation
- Steam lines
- Exhaust ducting
- Valves
- Tanks
- Pipework
- Boilers
- Flange covers
- Pressure vessels
- Heat exchangers

Belzona® provides the solution to your repair and maintenance needs.

BELZONA
Repair • Protect • Improve

Belzona® 3211 (Lagseal) is:

Simple

- Easy brush application
- Can be spray applied
- No specialist tools required

Safe

- Cold temperature ensures no fire risk
- Equipment easily cleaned

Versatile

- Suitable application onto new and existing lagging on steam, condensate or chilled pipelines
- Simple to achieve completely seamless encapsulation at elbows, T pieces or flanges
- When applying to damp surfaces it allows moisture to evaporate, keeping insulation dry and efficient
- Can be applied to damp surfaces

Effective

- Will not support growth of bacteria or algae providing hygienic finish
- Excellent oil and chemical resistance
- Highly flexible
- Withstands movement due to temperature fluctuations and vibrations within the system
- Resists water, steam impingement, infra-red and ultra-violet radiation.
- Class 0 in accordance with UK building regulations
