Belzona Polymerics Provides Additional Contracting Services for Customers

Harrogate, England – (March 2008) Yorkshire based company Belzona Polymerics Ltd, a world leader in the design and manufacture of industrial protective coatings and polymer repair composites, has seen significant developments in the contracting division of the business. Belzona Technosol Ltd has received a major investment which will facilitate long term growth and help to enhance support to its customer base.

Belzona Technosol will now be managed in-house from the Belzona headquarters in Harrogate which will allow customers to deal directly with Belzona as a single source for both the material manufacturer and provider of a complete application service. Additional services now in place will allow Belzona Technosol to provide customers with direct labour, contract management of projects and a Q.A inspection service to customers or nominated contractors.

Operating from its regional offices based in Wrexham and Livingston, local service to customers will be provided by a network of trained Belzona Technical Consultants resulting in a fast, effective and reliable service.

Steve Cooper, Commercial Manager for Belzona explained, “We are simply responding to the demands of our market. Our customers purchase Belzona products for performance and reliability but require a complete package combining quality Belzona materials and a highly effective reliable application service. This allows flexibility for the customer as there is now a one point responsibility contact which ensures efficient and exceptional customer service.”

Other recent changes have also been focused in several other key areas of the business including a large recruitment drive that is currently underway to identify new contractors to join the Technosol team. In addition to this a new corporate branding initiative has helped to reflect the company’s professional image demonstrated through the purchase and design of two new Technosol vans.

About Belzona Polymerics Ltd.

Manufacturer of industrial protective coatings and repair composites since 1952, Belzona provides a wide variety of applications to rebuild, repair and maintain machinery, equipment and building structures. Belzona’s local on-site Technical Consultants analyze the situation, recommend the solution, and supervise the application. With their Global Distribution Network covering over 120 countries and 24-hour Technical Support, Belzona is established in the forefront of industry by serving such markets as oil and gas, power, marine, and water/wastewater.
