In The Pipeline On The Net

The second edition of the bi-annual newsletter, In The Pipeline, is now online, bringing you the latest news and in depth articles about Belzona and industrial maintenance solutions for the upstream and downstream Oil & Gas Industry.

This edition features the news of how a global giant are utilising cost-effective flange face repair solutions and details of how our Belzona 3211 (Lagseal) product can be used to protect against corrosion under insulation.

Elsewhere in this issue, we take a look at the chemical resistance of Belzona high temperature linings and bring you tips on how to ensure your projects run according to schedule, without sacrificing quality control.
