

UV STABLE SEAMLESS FLOOR COATING

UV stable, solvent free, seamless floor coating for the protection of industrial, commercial and administrative facilities.

Belzona 5233 is a waterborne, solvent free, UV stable floor coating to provide long term protection and durability on internal and external floor applications. It is primarily designed to be used in conjunction with Belzona 5231 as a primer and various aggregates to create a seamless slip-resistant flooring in various facilities.

Belzona 5233 provides outstanding mechanical strength and resistance to abrasion caused by vehicular and foot traffic, and to exposure to most chemicals.

Belzona 5233 is versatile in use: floor wear and abrasion protection, safe and slip-resistant floor coating and safety markings in areas with extensive movement of personnel as well as decorative flooring finishes where an aesthetically pleasing look is required.

TECHNICAL DATA*

Mixing Ratio (Base:Solidifier) CLEAR 3.3 : 1 by weight 3.7 : 1 by volume GREY 5.4 : 1 by weight 5.0 : 1 by volume	Working Life 1 hour at 10-40°C (50-104°F)	Shelf Life 2 years
	Pull Off Adhesion (ASTM D4541) Concrete: 400 psi (2.76 MPa)	Coverage Rate 4.0 m ² (43.2 ft ²) / 1 L at a thickness of 10 mils (250 microns)
Abrasion Resistance (ASTM D4060) CS17 - 13 mm ³ loss per 1,000 cycles	Shore D Hardness (ASTM 2240) 81	Cure Time Full mechanical hardness after 5 days cure at 20°C (68°F)

*Please consult the Product Specification Sheet and Instructions for Use for latest technical data

KEY FEATURES

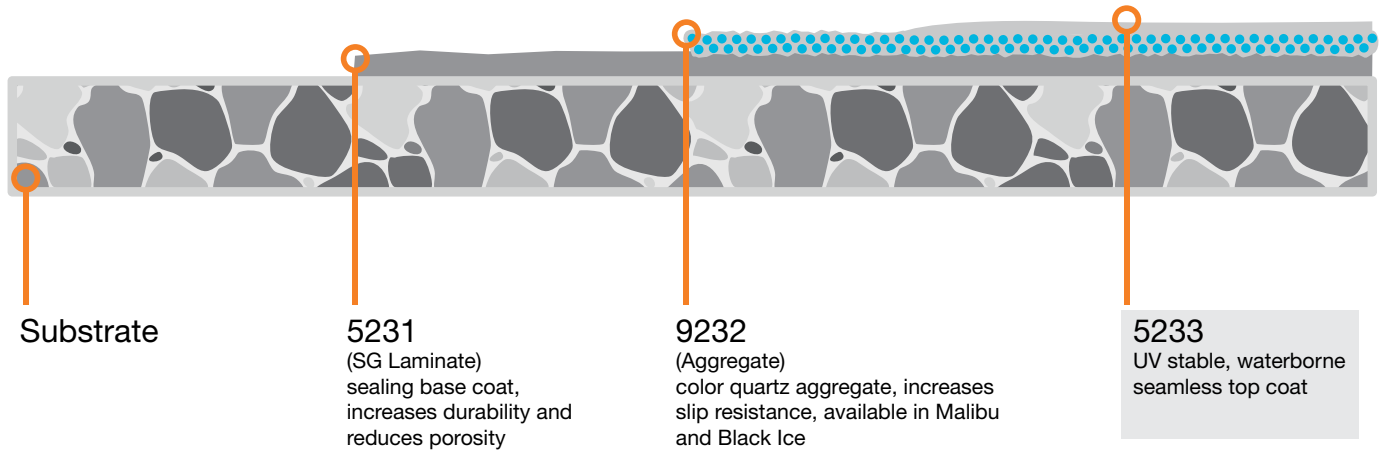

- Excellent UV stability
- Chemical resistance
- Abrasion resistance
- Environmentally friendly
- Solvent free
- Safe to use

Belzona 5233 is part of the Belzona 5000 series of high performance protective coatings. For more information, consult the Belzona 5000 series flyer.

APPLICATIONS

- Warehouses
- Shopping centers
- Workshops
- Garages
- Entrances
- Walkways
- Loading docks
- Manufacturing plants
- Bridges
- Ramps
- and many more!

RECOMMENDED UV STABLE FLOOR COATING APPLICATION

PF5233-EN-0317
