

# Belzona App

Product and application information at your fingertips

## PRODUCT SERIES

### BELZONA® 1000 SERIES Metallic Polymers

For the repair and protection of machinery and equipment

### BELZONA® 2000 SERIES Elastomeric Polymers

For abrasion resistant linings and the repair and protection of flexible components

### BELZONA® 3000 SERIES Polymeric Membranes

Waterproofing and weatherproofing systems for the repair and protection of buildings and structures

### BELZONA® 4000 SERIES Magma Polymers

For the repair and protection of concrete subject to abrasion, impact, and chemical attack

### BELZONA® 5000 SERIES Environmental Polymers

For the protection from physical, chemical, or bacterial attack in a diverse range of environments

### BELZONA® 7000 SERIES

For deep grouting and to provide precise alignment of equipment and high load bearing capabilities.

#### BELZONA APP DETAILS:

Once installed, access materials offline:

- Product information
- Industry solutions
- Technical documentation
- Instructions for use
- Chemical resistance charts
- Videos

Repair • Protect • Improve

Providing Repair and Maintenance Solutions  
to the Windpower Industry

# SOLUTIONS FOR WINDPOWER

## LEADING EDGE WEAR

Rebuild the leading edge with Belzona composite repair systems and protect it with Belzona erosion and abrasion resistant coatings

## SLIPPERY WORK AREA (NACELLE)

Belzona positive grip system provides safety to maintenance crews for repair work on top of Nacelle

## NACELLE PANEL SEALING

Protect Nacelle panels from weather conditions with Belzona weatherproofing coatings

## TOWER AND PLATFORM SEALING

Maintain the integrity of the entire tower structure with Belzona weatherproofing coatings

## GENERAL IMPACT DAMAGE

Blades are constantly exposed to the impact damage. Rebuild the blade with Belzona composite repair systems

## SHAFT DAMAGE

Repair worn and damaged shafts with Belzona composite repair systems

## TIP DAMAGE

Rebuild damaged blade tip with Belzona composite repair systems

## STRUCTURE CORROSION

Protect the wind turbine tower from corrosion with Belzona corrosion resistant coatings

## THREADLOCKING

Lock threads in place with Belzona cold bonding materials

## CABLE SEALING

Reseal exposed cables with Belzona elastomeric materials

## LADDER DAMAGE AND SAFETY

Repair and protect damaged ladders with Belzona repair composites and protective nonskid systems

## TRANSFORMER LEAKS

Repair transformer oil leaks with Belzona rapid curing, surface tolerant repair systems

## CONCRETE FOUNDATION DAMAGE

Repair, rebuild and seal damaged concrete around the base of the turbine structure with Belzona concrete repair systems and protective coatings

## ANCHOR BOLT CORROSION

Protect anchor bolts heads against corrosion with Belzona 3411 encapsulation system
