Product Data

Concrete Protection System for Surfaces Exposed to Movement

Belzona® 4151 (Magma-Quartz Resins) is a two component system that provides a tough seamless coating suitable for protecting various substrates from moisture ingress and chemical attack. It can also be injected to accomplish repairs such as crack stabilization and shimming pump bases.

Belzona® 4151 (Magma-Quartz Resin) will:

- Repair concrete surface and bases
- Serve as an ideal grouting and bonding system
- Provide protection from many chemicals

Belzona® 4151
Magma-Quartz Resin

Base Plate Grouting

Decorative Flooring

Crack Stabilization

Floor Chemical Resistance

Applications for Belzona® 4151 (Magma-Quartz Resin) include:

- Chemical containment areas
- Concrete tanks
- Stabilization of cracks and pump bases
- Underground structures
- Warehouse and production areas

Belzona® 4151 (Magma-Quartz Resin) is:

Simple

- Easy two-part mix
- Material can be applied by brush, roller, squeegee, or injection gun

Safe

- Zero VOC's
- No tainting of food products
- Meets USDA requirements for incidental food contact
- Provides hygienic surface

Versatile

- Can be mixed with aggregate to desired consistency
- Can be applied and cured under adverse conditions
- Resistance to environmental attack
- Excellent adhesion to many substrates
- No shrinkage regardless of thickness applied
