Industrial Coating for Corrosion Protection at Elevated Temperatures

Belzona® 1591 (Ceramic XHT) is a two-component high-temperature coating system designed to resist water, hydrocarbons, aqueous solutions, and pressurized steam up to a temperature of 356°F (180°C).

Belzona® 1591 (Ceramic XHT) will:

- Simplify maintenance procedures
- Minimize downtime
- Provide excellent erosion-corrosion resistance
- Extend equipment life

Belzona® 1591 (Ceramic XHT) exhibits excellent erosion-corrosion resistance at elevated temperatures, through a unique binary curing mechanism. This mechanism allows application and cure at ambient temperatures with additional higher temperature resistance being achieved in service through post curing.

Applications for Belzona® 1591 (Ceramic XHT) include:

- Separators
- Heat exchangers
- Knock-out drums
- Regenerators
- Pumps
- Absorbers
- Scrubbers
- Return tanks
- Steam turbine casings
- Distillation units
- Isolation spools
Belzona® 1591 (Ceramic XHT) is:

Simple
- Easily mixed and applied
- Allows for curing in service
- Applied as a single coat system

Safe
- Spark testable for pinholes and coating defects
- Solvent free

Versatile
- Bonds to a wide range of metallic substrates
- Adhesion maintained at elevated temperatures
- Suitable for use in pressurized water systems up to 356°F (180°C)
- Accidental mechanical damage & application defects easily repaired

Effective
- Resistant to thermal cycling
- Resistant to “steam out” process
- Excellent resistance to a wide range of chemicals
- Resistance to high pressures
- Corrosion protection in immersed conditions at temperatures around 356°F (180°C)
- Ability to withstand rapid depressurization
- Outstanding resistance to blistering

QUALITY PRODUCTS – TECHNICAL SUPPORT

The Belzona product range is manufactured through stringent quality and environmental control guidelines complying with the internationally recognized requirements of ISO 9001:2008 and ISO 14001:2004. Belzona has a global distribution network of over 140 Distributors operating in 120 countries. Local support is provided by trained Technical Consultants who will diagnose the problem, recommend the solution, and provide 24-hour on-site application supervision.
