Belzona 5811 (Immersion Grade) is a solvent-free system for the protection of metallic and non-metallic surfaces operating under immersion conditions in contact with aqueous solutions.

This coating can be both brush and spray applied, aiding rapid applications over large areas. It provides outstanding protection from the effects of salt water, acid, alkalis, alcohol, hydrocarbon and the environment.

This material can be applied to virtually any surface including cast iron, stainless steel, brass, copper, concrete, wood, fibreglass and aluminium.
